CorTru Presentation

June 27, 2023

History

1973 – Raytheon formed a small division on 2 acres at the current location, with equipment, staff and management to support operations at Kennedy Space Center. The capabilities were primarily welding, machining and field ironworking crews solely to support Raytheon efforts at the space center.

1993 – SDB Engineers & Constructors, Inc. (SDB) acquired the operation from Raytheon. The initial capabilities were retained but services were now offered to several KSC primes. SDB expanded capabilities to include corrosion control, painting and craft labor services. CGC, AISC, NACE and SSPC.

2017 – SDB hired a GM with 25+ years of federal contract experience, tasked to oversee the company, continue to serve the federal market and develop a plan to expand the client base. By 2019 all task objectives were met, and the company rebranded to the dba "CorTru".

2020 – The New GM formed a company, M5K Enterprises, Inc. (M5K) to begin negotiations with SDB to acquire the company. M5K's acquisition of "CorTru" was complete in 2021, retained the operational staff as well as all licenses and qualifications. The company continues to offer the same core services we're known for... craft labor services, corrosion control, iron work, and painting.
